

The benchmark for our industry since 1979
Let us make a believer out of you.

Two Light Fixture Kit 5- Step Quick Install Guide

A photograph of a submersible lighting fixture installed in a fountain. The fixture is at the bottom, emitting several jets of water that are illuminated from below, creating a glowing effect. The background is dark, making the illuminated water jets stand out.

SUBMERSIBLE
LIGHTING

www.arbrux.com

Thank you for choosing Arbrux!
Our products represent great quality at a great price!
We have worked hard to become the benchmark for our industry since 1979.
We are excited to show you how easy our products are to install...
Here we go...

Step 1: Tighten Light Connector

- Hand tighten lighting underwater connector from lights to shore power cable.

Step 2: Assemble

- Assemble U shaped bracket on fixture to L shaped bracket as shown.

U bracket to L bracket must be adjusted to ensure fixture is completely submerged when installed in water.

Step 3: Install

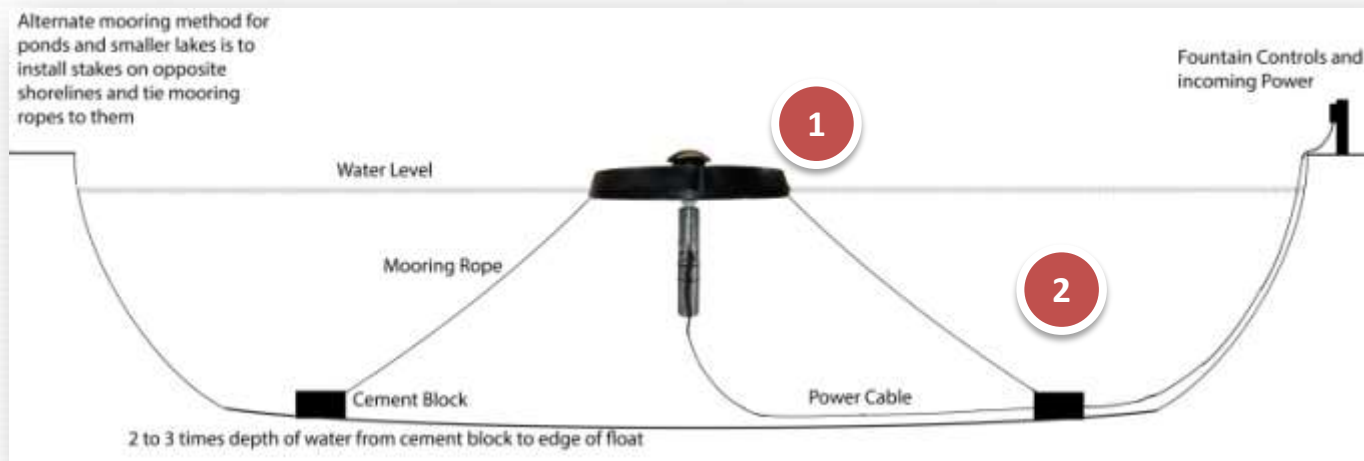

- Install L shaped bracket from previous step on float.

Shown on 40 inch float, 32 inch float can accommodate four fixtures maximum.

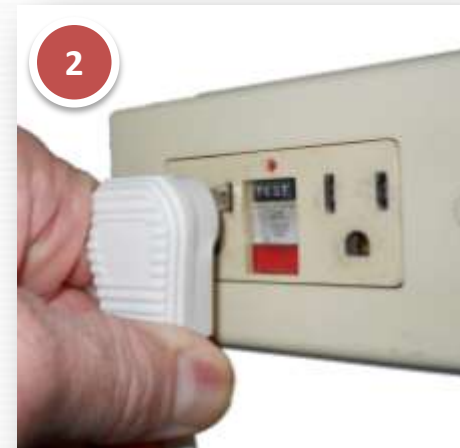

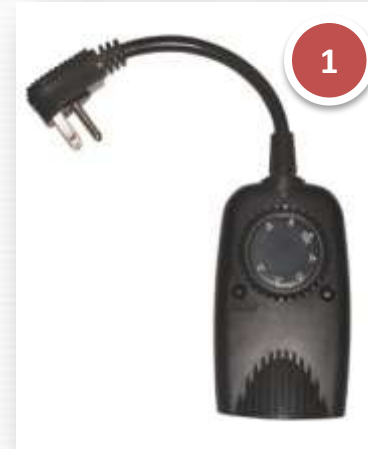

Step 4: Run Power Cables

1. Install fountain or aerator as per instructions and moor float.
2. Run power cables to shore.

Step 5A: Connect- ½ HP Single Phase

1. For ½ HP Single Phase models connect shore end of light kit cable to external lighting controller shown.
2. Plug controller into GFCI protected receptacle.
3. Adjust controller to desired setting.

Step 5B: Connect- For Larger Single Phase

For larger single phase models, have your electrician connect to applicable terminals in control panel and adjust timer

You're Done... Time to Enjoy the View!
